seamless user experiences.  
Always eager to take on new  
challenges.**

# YEABSIRA ABIY

Hello, I'm

# YEABSIRA

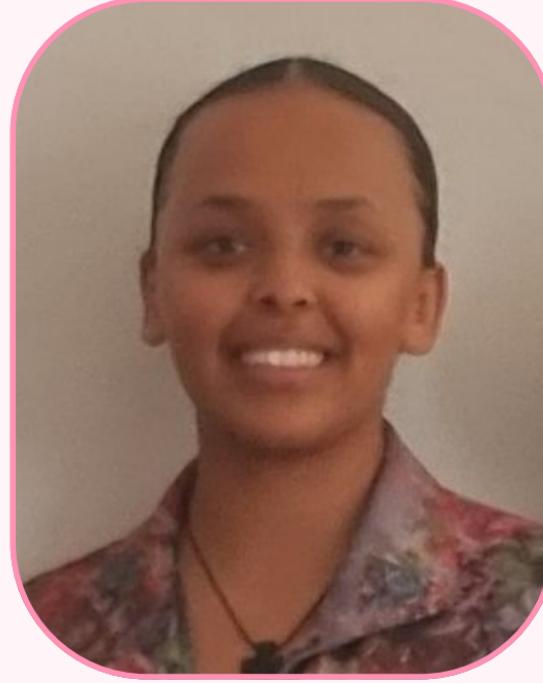

**Dedicated Software Engineer specializing in crafting seamless user experiences. Always eager to take on new challenges.**

## Short Biography

Ever since high school, I've been passionate about technology, especially after developing my first webpage with friends and watching TV programs about coding and computers. This early exposure made it easy for me to choose my major in university. Currently, I am pursuing a degree in Software Engineering at Addis Ababa University, where I have been immersed in learning everything from coding fundamentals to advanced software engineering concepts.

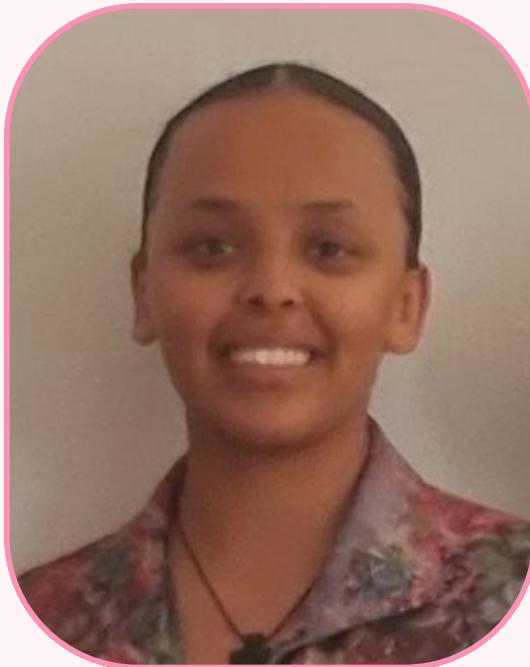

LEVEL	Institution & Details
Elementary	Gondar University Community School, KG to 8th Grade
High School	Dream Success High School, graduated 2022
University	Addis Ababa University, Bachelor's in Software Engineering (expected 2026/27)

One of my mentors used to say, "Coding is just the beginning. To truly thrive as a programmer, one must embrace continuous learning, adapt to evolving challenges, and excel in collaboration with a team." Over the years, I've embraced this philosophy, continually improving my skills in problem-solving, teamwork, consistency, and communication.

One of my mentors used to say, "Coding is just the beginning. To truly thrive as a programmer, one must embrace continuous learning, adapt to evolving challenges, and excel in collaboration with a team." Over the years, I've embraced this philosophy, continually improving my skills in problem-solving, teamwork, consistency, and communication.

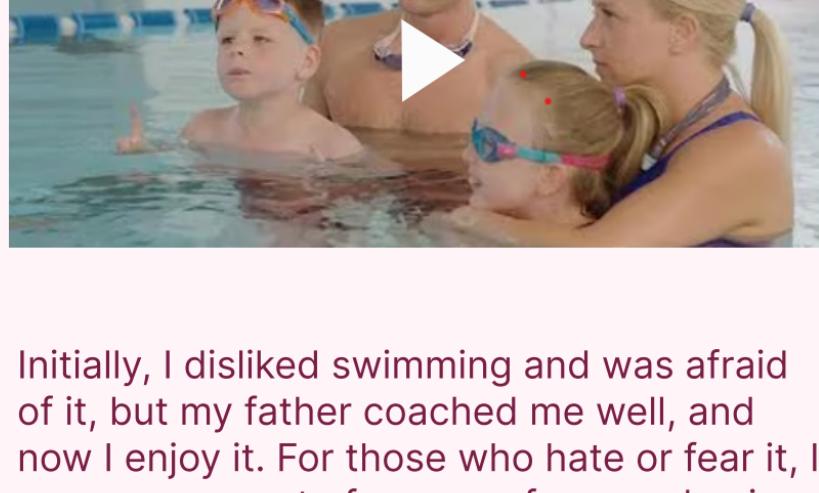

In my free time, one of my favorite things is spending quality time with my family. Our favorite game to play together is cards. I also enjoy a variety of activities. From sports, I like competitive games like bowling and swimming, which I do once a month or during my summer break. Additionally, I love sitting back and watching a good basketball game from time to time.

## Playing Cards

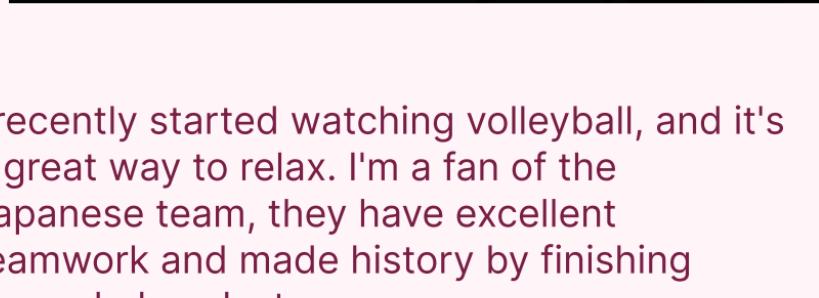

Playing cards is one of the best games to enjoy with family. It's a great way to chat and bond while having fun.

## Bowling

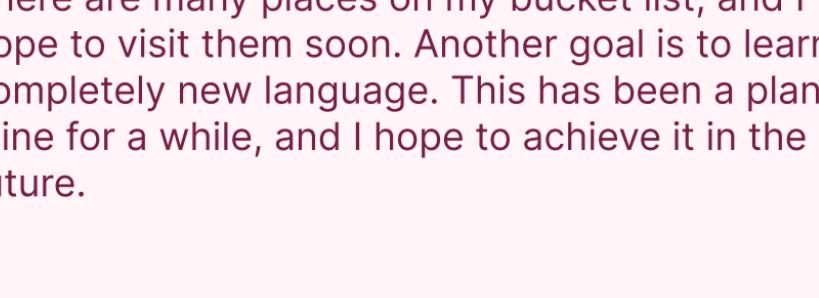

Bowling is perfect for playing with friends and siblings. It's a competitive and engaging game. There are places in Addis where you can play, and it's a lot of fun.

## Swimming

Initially, I disliked swimming and was afraid of it, but my father coached me well, and now I enjoy it. For those who hate or fear it, I encourage you to face your fears and enjoy the experience.

## Watching Volleyball

I recently started watching volleyball, and it's a great way to relax. I'm a fan of the Japanese team, they have excellent teamwork and made history by finishing second place last year.

## Future Plans

Looking ahead, there are several things I would love to do. One of my top goals is to travel more, which I haven't been able to do often because of school. There are many places on my bucket list, and I hope to visit them soon. Another goal is to learn a completely new language. This has been a plan of mine for a while, and I hope to achieve it in the near future.

YEABSIRA ABIY

## Personal Information

Name: yeabsira Abiy

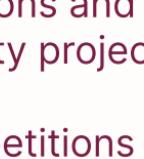

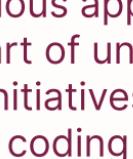

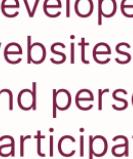

Age: 21

Nationality: Ethiopian

Career: Software Engineer

Languages: Amharic(My mother tongue) and English

## Social Media

## Experience

Developed various applications and websites as part of university projects and personal initiatives.  
Participated in coding competitions and hackathons.

## Education

Bachelor's degree in Software Engineering (expected 2026)  
Addis Ababa University

Relevant Coursework: Advanced Software Engineering, Data Structures and Algorithms, Database Management Systems, web development.

Extracurricular Activities: Active member of the Computer Science Club, participated in coding competitions and collaborative projects

## Professional Summary

With a keen interest in technology, I have been actively involved in software development projects since high school. I have developed skills in various programming languages and have collaborated with different people, which has enhanced my problem-solving abilities and teamwork skills. My goal is to continuously learn and grow in the field of software engineering, tackling new challenges and contributing to innovative solutions.
